XIAMEN UNIVERSITY MALAYSIA

Marking Scheme

1. 10 points

(a) support calculation (6 points):

s({a}) = 7

s({d,e}) = 7

s({a,d,e}) = 4

Note: both support and support count are considered correct.

(b) confidence calculation (4 points):

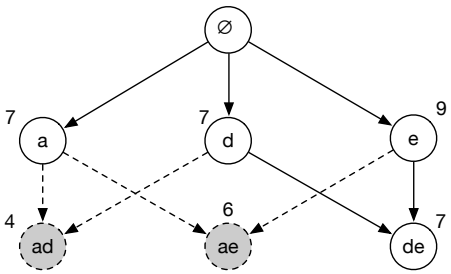

$c(\{d,e\} \rightarrow \{a\}) = \frac{s(\{a,d,e\})}{s(\{d,e\})} = \frac{4}{7}$

$c(\{a\} \rightarrow \{d,e\}) = \frac{s(\{a,d,e\})}{s(\{a\})} = \frac{4}{7}$

2. 10 points

(a) Based on the tree plot below,
the frequent itemsets are:

{a}, **{d}**, **{e}**, and **{d,e}**. (5 points)

(b) Based on the tree plot below,
the interesting association rules are:

{a,d}→{e} and **{a,e}→{d}**. (5 points)
