Developing the device to support my father's reading

First prototype 2013.12

People who have difficulty reading
(congenital dyslexia)

*1

2,800,000
people

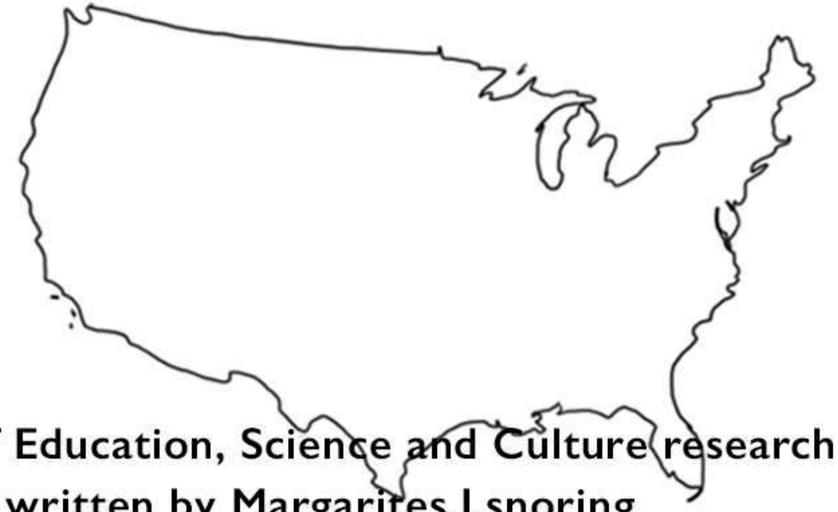

2.2% of the population in Japan

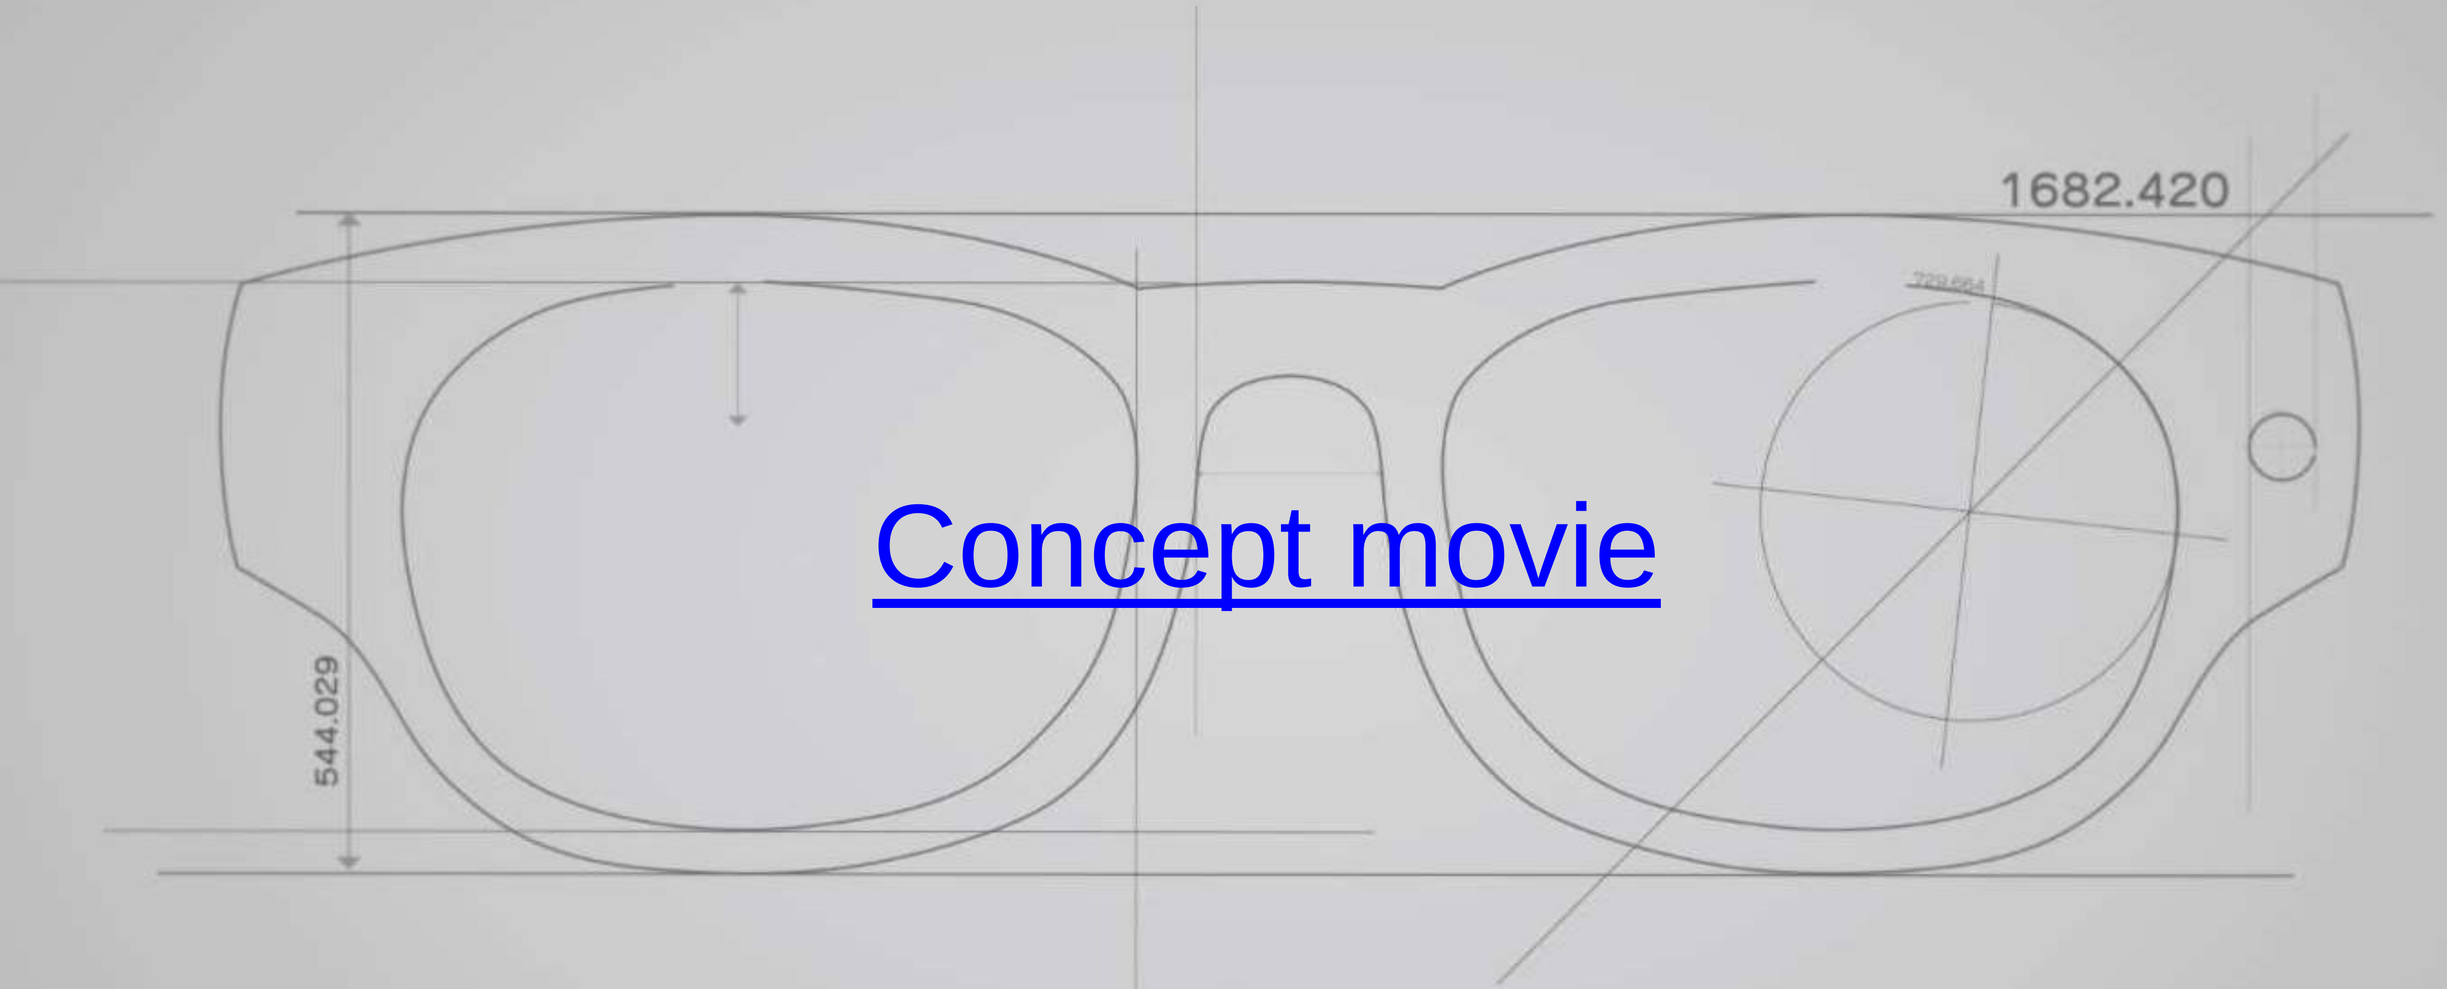

*2

19,000,000
people

6% of the population in the US

*1 : Ministry of Education, Science and Culture research 2012
*2 : "Dyslexia" written by Margarites.J.snoring

[Concept movie]

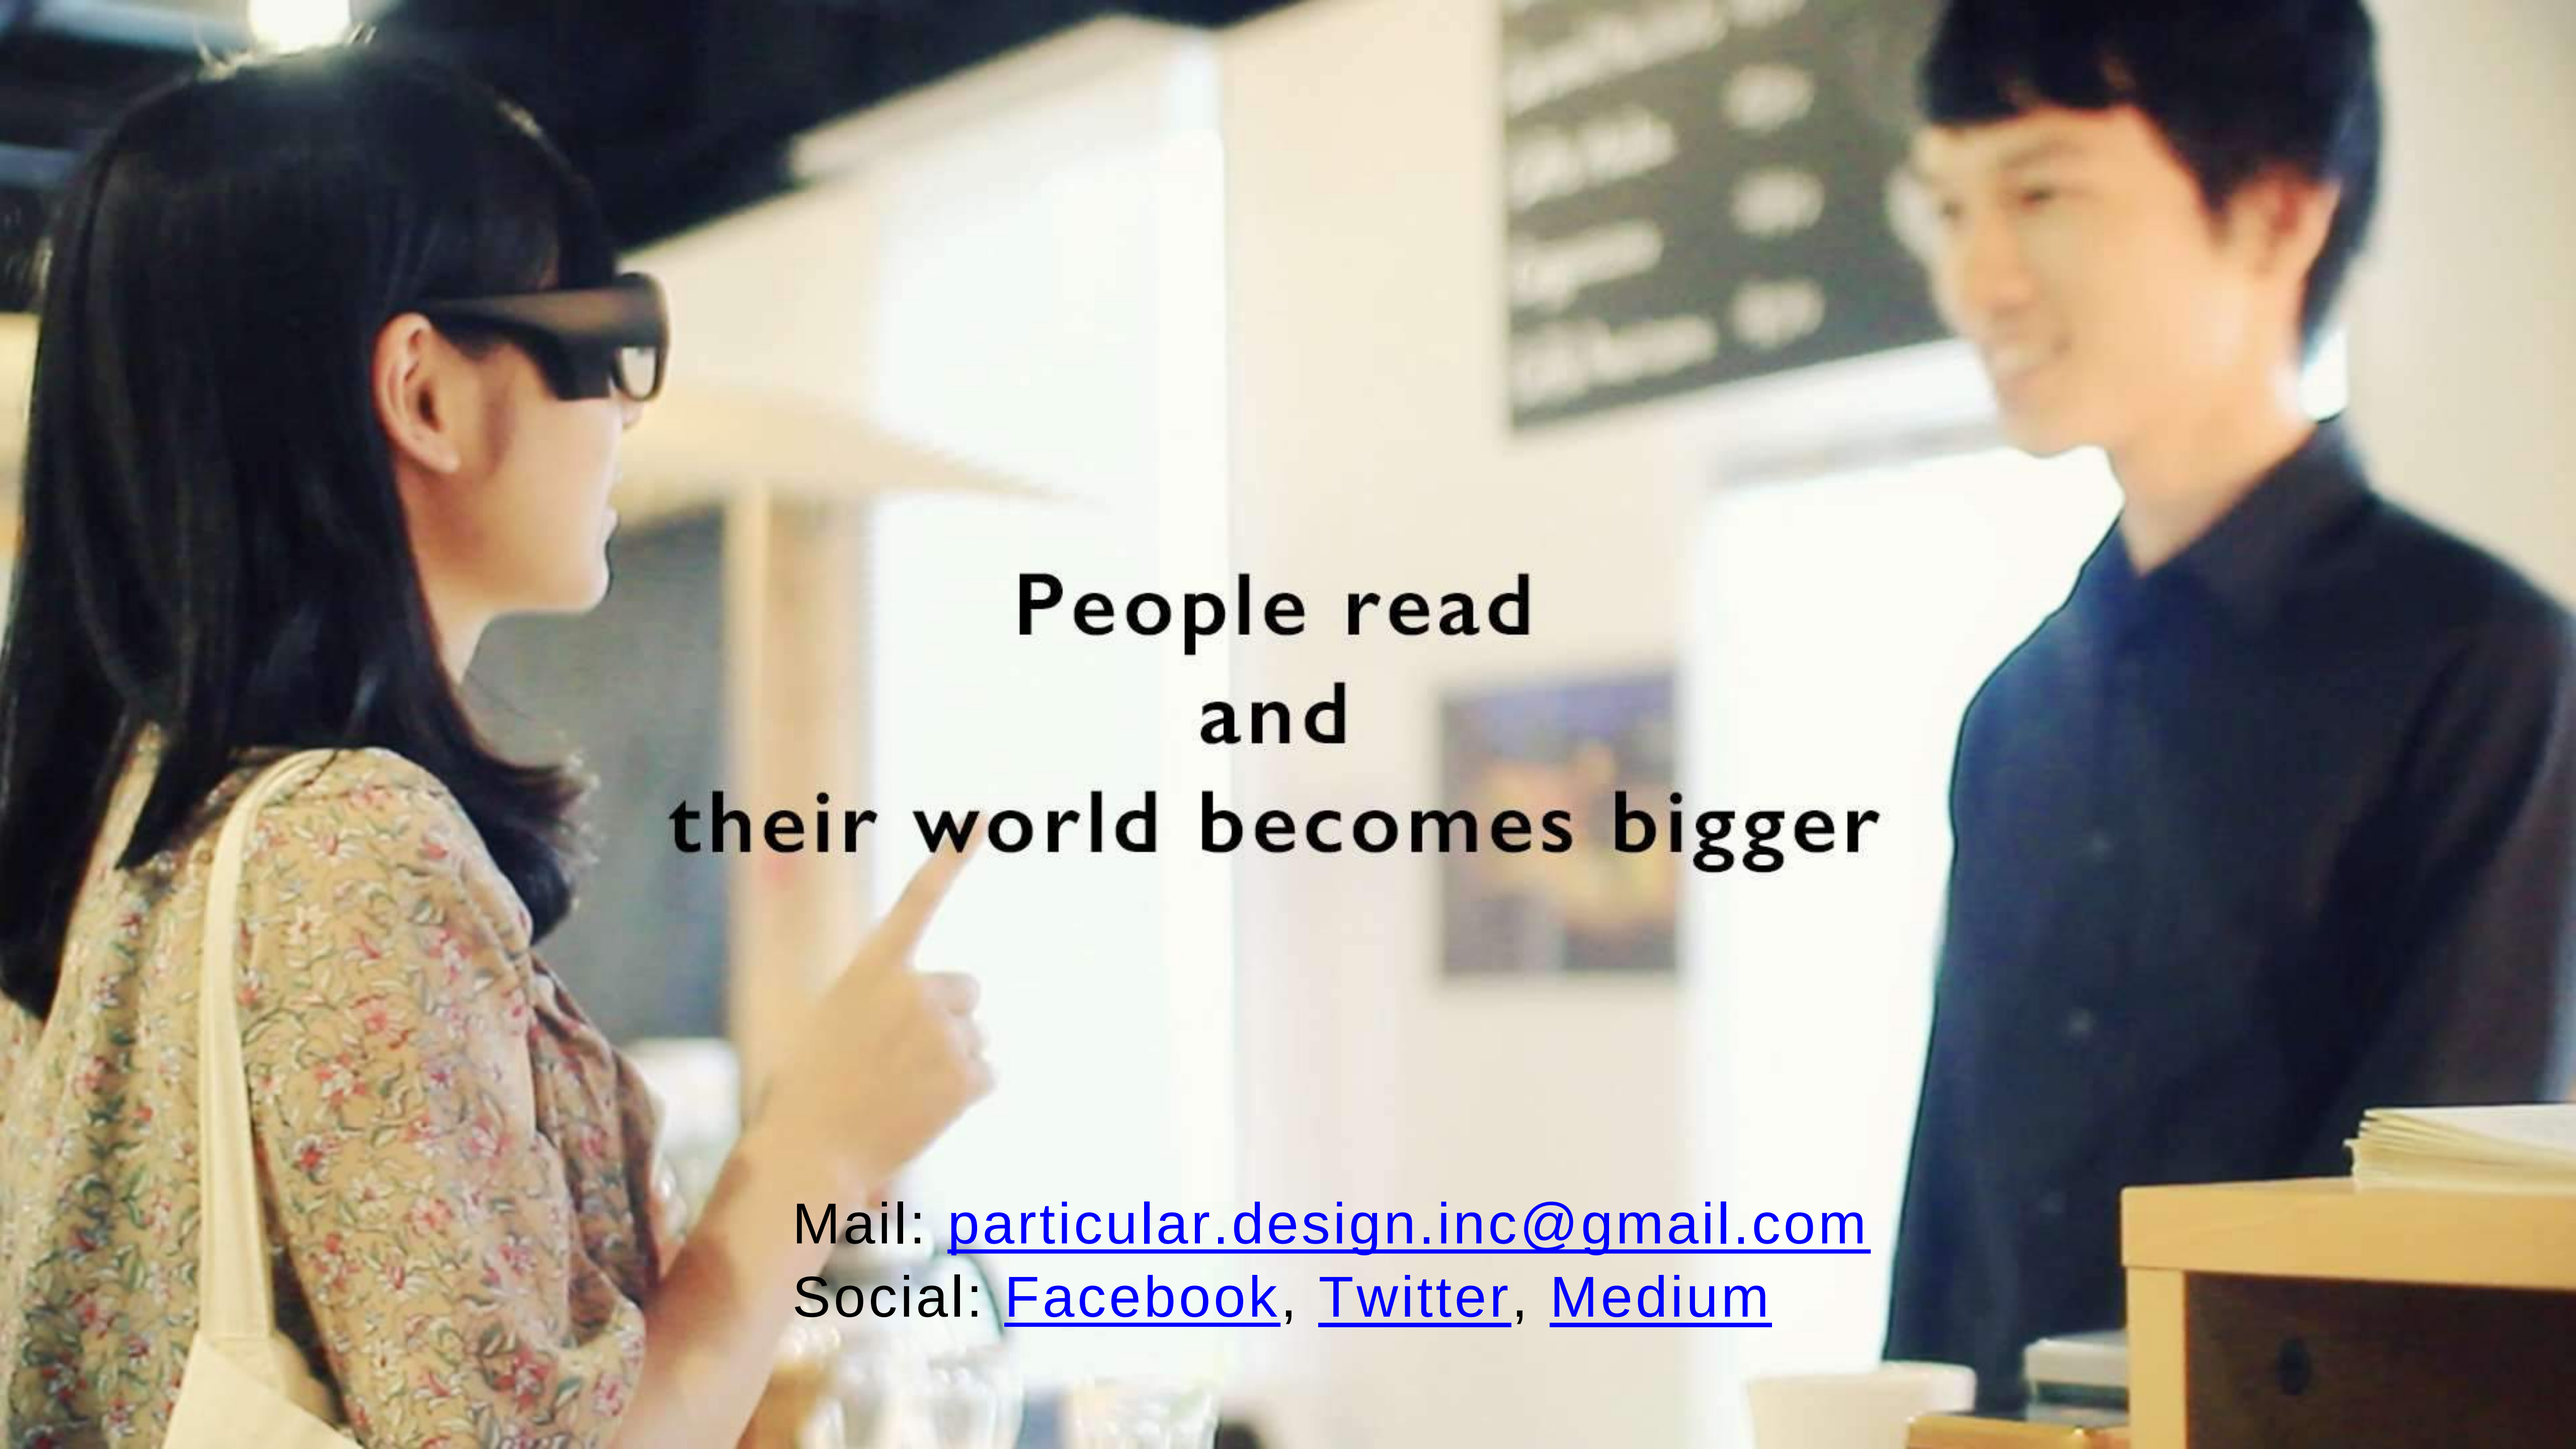

Developed the prototype for user tests

1. Natural styling and adapts to our lives
2. Sound feedback only (no display feedback)

Third prototype 2014.11

User test movie
